Initially, I was just starting to play this game, she was excellent proctically in everything and was much better than she is now. \*\*\*New Edit\*\*\* Because of the news about the 1.1 patch, I have changed the status of my review. Being able to equip multiple cosmetics per catagory make it much more worth it imo. Thanks!

\u2014(edit)\u2014

Yeah, support the devs with it. But the devs should also add the ability to equip multiple cosmetics. If I have a goatee, let me wear some glasses with it. Make it worth it fellas. They make this happen, I will thumb it up without question.

\u2014\u2014\u2014

15 dollars so you can have a beard.

pretty bad dlc.. So far, this game has proven to be quite difficult and yet still extremely fun and well worth my time, unlike some other games which I got bored fairly quickly.

This game is fun and well paced, and yet, I'm not even up to my first boss, which is what I usually want, to find a game where even the first level can be potentially difficult if you are not careful.

I reccommend this to anyone who loves platformers, and loves a good fight, it is like the God of War series because you get to beat the crap out of everything, which for me is a big part of the reason I play many games.. Just doesnt work DO NOT BUY. A fun puzzle game backed with great, relaxing music.. Typical asset flippers, plus the game is buggy as hell and the story is crap I hate this kind of developers.. This game had potential, the screenshots/tutorial really don't represent what this game is like. The action sequences are dramatized, in no instance are you forced to take cover/duck and weave, Just maintain forward movement and you won't get hit.

The game has some interesting takes on features but nothing new what VRtoolkit offers. Level design is terrible. assets are inconsistent with detail/style. Sound design is abysmal.

enemy Ai is non-existent, simple look at and fire. enemies will shoot indefinitely at walls/barricades.

overall 2/10, Nice Assetflip.

I felt generous because maybe the locomotion may of taken 1-2 day to program/test

Not a \$30 game, 99cents-\$2 if that.

---

This game has plenty of potential. The story telling is reminiscent of Ace Combat 5: The Unsung War. All beautifully painted images against the backdrop of a young and desperate sounding narrative. I feel that this game is superbly constructed considering their budget. It is nice to see the futuristic tone for all of the vehicles and weaponry done in a believable way. It is like the Battlefield series with a little less polish but a lot more moxy. I hope for a sequel to this series with updated developer tools and a more seasoned staff (which I am sure they are now).. Stupid and ♥♥♥♥♥♥.. Don't get me wrong, this game is entertaining. It has pleasant visuals, good sound design, creepy atmosphere filled with symbolism, and an interesting concept behind it. However, there are two things which hold me back from recommending it:

- 1. Many puzzles either have illogical solutions or don't accept obvious solutions. A small example: a character A gives you a letter and asks to give it to their crush without disclosing who said crush is. However, there's another character B who is the same species as A and who is quite obviously pining for them. So you hand out the letter to B, right? Wrong. You put the letter into a mailbox in a world completely different to the one A or B inhabit. After which the letter, apparently, gets sent to B, who gives you a reward when you speak to them the next time. In that example it's at least possible to deduce a solution even though it requires an unnecessary middleman, but there are several situations where you are forced to go through every item in your inventory near every single NPC because you are stuck, especially if you want to 100% complete the game (which is possible to do in four hours, as you can see).**
- 2. Yume Nikki did it better. I bet this is not the first review you've seen that points this out, but seriously, pick up Yume Nikki (or Yume 2kki if you've completed the original) and enjoy just as atmospheric experience with a heavier focus on exploration, much more varied worlds and more content overall. Strange Telephone has better graphics, but that's the only thing going for it in this small competition.. This is an interesting game. A walking simulator with a few puzzles and an interesting narrative that unfolds through cassette tapes. Watching 2001 a Space Odyssey will help in understanding the ending. It is not very well optimized and even on a good computer with a 1070 I had to keep the settings low and still got judder from time to time. Overall though it was an interesting experience, a well told story, a good story, and it has an atmosphere good enough to pull you out of your room and into its world.. Rise of Venice is a good game overall. The graphics are wonderful and seamless. The realistic economic system that changes with supply and demand is difficult to master but is a godsend once you do, raking large profits. I found that this game is pretty fun over all and while I can't sit and play it for hours on end, I can easily see myself coming back time and time again to play.**
